

Figure 1 illustrates the experimental setup. A subject is seated at a table, viewing a video screen. A camera is positioned above the screen. A light source is positioned to the left of the screen. A scale bar is visible on the screen. The subject is looking at a video screen displaying a target (a small circle) and a starting point (a larger circle). The target is at a distance of 10 cm from the starting point. The subject is instructed to move the starting point to the target. The video screen is 10 cm high. The camera is 10 cm above the screen. The light source is 10 cm to the left of the screen. The scale bar is 10 cm long.
